EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Isaacs on 3/25/2005.

The application has been amended as follows:

IN THE SPECIFICATION

Change the title to –A METHOD OF MANUFACTURING A THIN FILM
MAGNETIC HEAD--.

After the title of the invention on Page 1 of the specification, insert a new line as -
-This is a division of application Serial No. 09/745,530 filed 11/26/2000, now US PAT.
6,665,142--.

Re. Abstract: Before the phrase of "thin film" as recited in line 1, replace the phrase "An object of the invention is to provide a" to –Method of manufacturing a--.

After the phrase "manufacturing procedure" as recited in line 3, delete the phrase of ", and a method of manufacturing the same".

Before the phrase of "an opening" as recited in line 12, replace the phrase of "have a step of forming" to –form--.

IN THE CLAIM

Re. Claims 2-9: Change the phrase "A method" as recited in line 1 to –The method--.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention such as the thin film coil comprises a first thin film coil pattern and a first connection pattern in the end of the first thin film coil pattern so that the first thin film coil pattern and the first connection pattern are integrated into one body and a second connection portion of the first magnetic layer is formed on the first thin film coil pattern and an insulating film as part of the insulating layer so as to cover at least the first thin film coil pattern, the first and second connection patterns, and the first magnetic layer and a surface of the insulating film is planarized by polishing until at least both the first magnetic layer and the second connection pattern are exposed and a conductive layer pattern is formed so as to be electrically connected to an exposed portion of the second connection pattern. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-9 are allowed.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 571-272-4565. The examiner can normally be reached on Monday-Friday between 8:00 AM to 4:00 PM.
